

Casket Protector with Clear Cover

Exceptionally Strong and Durable

Ensure-A-Seal's **Casket Protector / Clear Cover** is a sealed unit which provides a controlled environment for the casket. A necessary preventative measure, the **Casket Protector / Clear Cover** is an integral part of the complete entombment procedure.

Casket Protector / Clear Cover is meant for those families who need to have the casket in view during the entombment process.

Durable and strong, the cover is designed for both metal and wood caskets. The ONE-WAY check valve allows gases to escape. The seamless, plastic corrugated tray contains liquids. A casket can be sealed in just minutes.

By sealing a casket in an Ensure-A-Seal **Casket Protector**, you contribute to the general welfare of the cemetery, the well-being of the environment, and the families of the deceased.

Product ID # SFI-08

Specifications:

Tray: chemically hardened fiberboard

Tray liner: Ultra-material, specially formulated with 100% fiber reinforced PBNII/foil/PE.

Absorbent pad: SIL absorbent material formulated to quickly encapsulate liquids into solids

Cover: transparent high barrier, high strength laminate

Resistances: water, chemicals, aging, puncture, rot, fungus and mildew

Temperature range: -20⁰ F to 250⁰ F

Pressure release: One-way brass check valve

Sealing time: Less than 5 minutes

Size: 29 ¾" (w) x 85 ¾" (l)

Shipping: The lightweight unit ships by UPS.

US Patent Number: 4,922,590
